

DII Industries, LLC Asbestos PI Trust

TRUST UPDATE – March 9, 2017

Claims inactive five or more years: Beginning May 1, 2017, the Trust will deem withdrawn claims that have been inactive for five or more years without any action to cure deficiencies. The five or more year time-period includes any time a claim has been deferred if the deferral time was part of the period of inactivity. In the event a deemed withdrawn claim is refiled at a later date, the filing date of the original claim is applied in the SOL analysis.

The five or more year time-period does not currently include any time a claim's processing was inactive due to a Trust-imposed hold, such as holds on audited, secondary exposure, or Foreign Claims.

If you feel that a claim is incorrectly deemed withdrawn, you should contact the Trust. After May 1, 2017, the Trust will continue to deem withdrawn claims under this same criteria without further notice.
