

DII Industries, LLC Asbestos PI Trust

TRUST UPDATE – September 28, 2016

Documented Site List: The Trust has undertaken two major projects involving the Documented Site List. The first project involves a review of Harbison-Walker litigation records, which the company and its counsel have produced to the Trust over the last few years. The second project involves the review of Debtor records concerning utility-related sites. In response to information discovered during these projects, the Trust has made changes to its Documented Site List, which are summarized below. The Trust expects to make further changes as additional information comes to light.

Action Taken	HAL	HW
Added sites	0	152
Updates to site date ranges	4	162
Replaced sites	116	59
Removed sites	2	109

Posted on the Trust's website is a searchable list of the specific sites involved.

When changes are made to the Documented Site List, the Trust works with the Delaware Claims Processing Facility to identify and update impacted claims. No claim is summarily rejected due to a site change, rather, it is reviewed in light of the change and updated accordingly. Claims with a pending offer or awaiting payment are not impacted by these changes. You should review your inventory of claims to determine whether these changes, or any future changes, impact a particular claim.

The Documented Site List is posted on the Trust's website for your regular review. When updates are necessary, the posted Documented Site List will be refreshed on the following dates: January 15, April 15, July 15, and October 15. Additionally, beginning in 2017, changes to the Documented Site List will be identified and reported in the Trust's Annual Report. This report is typically posted on the Trust's website shortly after it is filed each spring.
